OF

The University of Chicago Press

The Evolution of Early Christianity. By Shirley Jackson Case, Associate Professor of New Testament Literature in the University of Chicago.

390 pages, 12mo, cloth; \$2.25, postage extra (weight 1 lb. 11 oz.)

The beginnings of the Christian movement are here studied from a wholly new point of view. By examining the actual religious situation in which the Christians of the first century lived, the author is able to shed fresh light on many parts of the New Testament. Some of the subjects discussed are Christianity's developmental nature, the importance of environment for Christian origins, the early believers' Jewish connections and the causes of their break with Judaism, their contact with various gentile religions such as emperor worship, Stoicism and oriental mystery cults, and the ultimate triumph of Christianity.

Water Reptiles of the Past and Present. By Samuel Wendell Williston, Professor of Paleontology in the University of Chicago.

256 pages, royal 8vo., cloth; \$3.00, postage extra

A comprehensive volume of great scientific importance, by the author of *American Permain Vertebrates*, which has become a recognized authority in its field. The book discusses in sixteen chapters the classification and skeletons of reptiles, their age, the adaptation of land reptiles to life in the water, and the various orders.

The Lincoln and Douglas Debates. (*Publications of the Chicago Historical Society.*) By Horace White.

With 4 plates, 32 pages, 8vo, paper; 25 cents, postpaid 29 cents.

This account of the famous debates is notable because the writer accompanied Mr. Lincoln on his tour of Illinois and reported his speeches. Mr. White's later experience as editor of the *Chicago Tribune* and of the *New York Evening Post* peculiarly qualifies him for setting forth adequately the character and effects of the debates.

THE UNIVERSITY OF CHICAGO PRESS

William James and Henri Bergson. By Horace M. Kallen, Instructor in Philosophy, University of Wisconsin.

264 pages, 12mo, cloth; \$1.50, postage extra

A striking presentation of the relation between the philosophies of William James and Henri Bergson. The book is particularly significant as coming from a former student and intimate friend of Professor James.

THE UNIVERSITY OF CHICAGO
SCIENCE SERIES

This new series enables the investigator to present the results of his special researches, not only to a wider public but to his scientific colleagues, in a form more attractive and accessible than is possible through scattered contributions in technical journals.

The following volumes are already in press:

The Origin of the Earth. By Thomas C. Chamberlin, Head of the Department of Geology in the University of Chicago.

16mo, cloth; \$1.00, postage extra

The Evolution of Sex in Plants. By John Merle Coulter, Head of the Department of Botany in the University of Chicago.

16mo, cloth; \$1.00, postage extra

PUBLICATIONS IN RELIGIOUS EDUCATION

Problems of Boyhood. A Course in Ethics for Boys of High-School Age. By Franklin W. Johnson.

154 pages, 12mo, cloth; \$1.00, postage extra (weight 1 lb. 1 oz.)

This book, prepared by the laboratory method, is the result of the experience of a teacher of boys in the high school, a leader of high-school boys in the Sunday school, and of work with boys of a similar age in Young Men's Christian Association groups. The author is the principal of the University of Chicago High School. Such topics as Keeping Clean, Habits, Gambling, Betting, Clean Speech, Right Thinking, Sex, Loyalty, Self-Control,

and other themes of equal importance are discussed informally and in such a way as to arouse the keenest interest on the part of boys. This long-needed book will be useful, not only in the Sunday school, but in day-school and Association classes. It is the first book in the field to start with a recognition of the boy's point of view.

These volumes are now in press:

The Sunday-School Building and Its Equipment. By Herbert F. Evans.

16mo, cloth; 75 cents, postage extra (weight 12 oz.)

With the modern reorganization of the curriculum of the Sunday school there has come an urgent demand for adequate housing of the school; and the author in this book answers the question as to how buildings should be constructed for Sunday-school use, and how old buildings may be remodeled at a moderate expense. It is the most recent practical discussion of Sunday-school architecture.

Graded Social Service for the Sunday School. By William N. Hutchins.

16mo, cloth; 75 cents, postage extra (weight 12 oz.)

A highly suggestive discussion of the question as to what may be done in the Sunday school to convert its social teaching from theory into practice. As the outcome of a wide study of present activities the author presents a varied program of possibilities, from which teachers and workers may select according to the conditions in their own schools.

The Weather and Climate of Chicago. (Publications of the Geographic Society of Chicago.) By Henry J. Cox, Professor of Meteorology, United States Weather Bureau, and John H. Armington, Local Forecaster, United States Weather Bureau.

396 pages, 8vo, cloth; \$3.00, postage extra (weight 3 lbs. 1 oz.)

This book, of general interest because of its character and authority, will naturally be of peculiar interest to residents of

Chicago and the Middle West. Its importance is indicated by the fact that it is issued under the auspices of the Geographic Society of Chicago, and has been prepared by two of the best known weather experts in the country. It includes discussions of a great variety of subjects, such as temperature, precipitation, atmospheric moisture, cloudiness and sunshine, wind direction and velocity, barometric pressure, and storm tracks; and among the interesting appendixes to the book are one on the weather of holidays and another containing journal entries relative to the great Chicago Fire of 1871.

The volume contains also a remarkable series of tables with reference to temperature, precipitation, atmospheric moisture, and atmospheric pressure—one hundred and forty-seven in all, with more than one hundred figures and plates.

Unpopular Government in the United States. By Albert M. Kales, Professor of Law in Northwestern University.

272 pages, 12mo, cloth; \$1.50, postage extra (weight 1 lb. 8 oz.)

This volume by a prominent member of the Chicago bar is an especially timely book, presenting with great clearness and cogency some of the political needs of the country, particularly the necessity of the short ballot. The author defines unpopular government as one of centralized power which is able to maintain itself in the face of popular disapproval.

The first part of the volume deals with the rise of the "politocrats"; the second discusses various expedients for restoring the American ideal of democracy; while the third considers constructive proposals like the commission form of government for smaller cities, and the application of the principles underlying this form to larger cities and the state, and to the selection of judges. The book has already attracted wide attention and discussion.

Chicago Tribune. Albert M. Kales, Professor of Law in Northwestern University, has written a book which ought to be read wherever citizens are perplexed by the intricacies and distressed by the failures of government.

FINE INKS ^{AND} ADHESIVES
